The 13th International Conference

4-5 December 2013
Łódź, Poland

**THE LATEST TRENDS
IN THE CONSTRUCTION
AND APPLICATIONS
OF BALLISTIC ARMOUR**

**„PROTECTING THE HUMAN
LIFE AND HEALTH”**

Dear Sirs and Madams,

The Institute of Security Technologies MORATEX, the organizer, has the pleasure to invite You to the 13th International Conference „The Latest Trends in the Construction and Applications of Ballistic Armour” which will be held on 4-5th of December 2013 in Lodz, POLAND.

Coorganizers of the conference are leaders of ballistic armour design from Russia: Scientific Research Institute of Steel NII STALI, Moscow and ARMOCOM Center for High-Strength Materials, Khotkovo.

The primary goal of the conference is to disseminate the recent scientific achievements and their practical application. Moreover we aim at sharing experience among the participants from scientific and business environments on a global scale.

The conference covers a broad spectrum of issues related to designing advanced ballistic armours, their safety and performance assessment.

We are confident that the influential Participants will provide the highest standards of debate and that the Scientific Committee will support the identification of strategic directions of research in the field of ballistic armours.

Selected papers will be published in „Fibres & Textiles in Eastern Europe” – the periodical present at the ISI Master Journal List (ISSN 1230-3666), other publications will be included to the conference monograph.

The conference will be held in English.

For more details on the Conference please visit <http://www.moratex.eu/en/?dzial=konferencje>

Yours faithfully,

Organizational committee

Address:

The Conference will be held in the Golden Floor, University Business Park Room A6/7
ul. Wólczańska 178
90-001 Łódź

Organizational Committee:

Lidia Górską
Jan Tabaszewski
Mateusz Gajdacz
