

**PREVENT PROJECT****FINAL EVENT****23 July: 14:00-16:15 (CET)****PUBLIC ONLINE MEETING**

PREVENT (procurements of innovative, advanced systems to support security in public transport) is a Horizon 2020 project. It focuses on pre-empting attacks in public transport by enabling earlier detection of threats, tracking individuals or situations and coordinating the best response with the relevant stakeholders.

PREVENT has been funded by the European Commission to initiate the work on a future PCP dedicated to security in public transports. PREVENT relies on the Pre-Commercial Procurement (PCP) approach. Promoted, supported and co-financed by the European Commission, this procurement process ensures the development of cutting-edge technologies that are tailored to YOUR needs.

During PREVENT final meeting, you will learn more about security challenges in public transport and perspectives at European level to tackle these challenges.

**Meeting organisers**

Anne Mordret - UITP

Youssef Bouali – ENG
